EDUCATION

Prairie View A&M University

B.B.A. in Management Information Systems

- GPA: 3.3 | Honor Roll (Spring '25, '26)
- Relevant Coursework: Fundamentals of MIS with ERP, Networking, Object-Oriented Programming (Java), Business Statistics, Financial & Managerial Accounting

Prairie View, TX

Expected May 2027

EXPERIENCE

PVAMU College of Business

IT Operations Intern

- Identified a campus-wide visibility gap by scraping the school's event site with Python, surfacing organizations that hosted events without posting them and limiting participation to students already connected to the College of Business.
- Architected the solution by leading the rollout of a centralized Microsoft SharePoint and Teams hub for posting and tracking organization events, applying the Software Development Life Cycle (SDLC) across design, testing, and deployment to broaden equitable access to opportunities.
- Configured secure access provisioning and administered systems access for student leadership, ensuring appropriate permissions and operational continuity.
- Provided hands-on IT support across College of Business facilities by verifying projector operation in classrooms, initializing and deploying software updates on room computers, and maintaining endpoint readiness.

Prairie View, TX

Jan 2026 – Present

Jones & Jones Strategic Consulting

Financial Operations Assistant

- Attained 100% audit-readiness across consulting engagements by managing complex financial records, monitoring data integrity, and maintaining regulatory and compliance standards.
- Reduced annual tax-reporting turnaround from 3 days to under 4 hours by architecting custom Excel models that automated data reconciliation and compliance reporting.

Frisco, TX

Jan 2019 – Present

Kevin Kelley Concepts

Project Intern — Business Analysis

- Analyzed moderate-complexity business problems by synthesizing market feasibility, demographic, and zoning research, delivering a data-backed business case and reporting to the leadership board.

Dallas, TX

Jul 2025

PROJECTS

Predictive Analytics Pipeline Independent Project

Python, TensorFlow, External APIs

Jan 2026 – Present

- Engineered an automated end-to-end Python pipeline validating live data via external APIs, and built a TensorFlow regression model that improved predictive precision by 15%.
- Applied all four types of data analytics — descriptive, diagnostic, predictive, and prescriptive to transform raw data into actionable, decision-ready recommendations.

Sandia Labs Panthers Invent '25

AI + IoT Team Project

Sep 2025

- Secured a 3rd-place national finish by leading a cross-functional team through a 72-hour sprint to develop an AI + IoT monitoring solution, directing prototype development and the executive-level presentation.

LEADERSHIP & ACTIVITIES

- President, Beta Alpha Psi | Director of IT, PVAMU Strategy Group | Member, Dean's Student Advisory Council
- Association for Information Systems (AIS) | National Society of Black Engineers (NSBE) | ColorStack | NSLS

TECHNICAL SKILLS

Languages: Python, Java, C#, SQL, HTML, CSS

Tools & Platforms: Microsoft 365 & SharePoint, Teams, Excel (advanced modeling), Power BI, Tableau, Git, TensorFlow, Firebase, Google Cloud

Concepts: SDLC, Application Support & Troubleshooting, Networking, ERP Fundamentals, Data Reconciliation, Compliance & Audit Readiness, Data Analysis
